

Title	Speaker	Year	Date	CFU
Evolving concepts to balance ischemic and bleeding risk and optimize antiplatelet therapy after PCI	Prof. Giuseppe Gargiulo	1-2-3 year	04/03/25	8
Balloon Pulmonary Angioplasty in Chronic Thromboembolic Pulmonary Hypertension	Prof. Francesco Saia	1-2-3 year	12/03/25	
Transcatheter therapies for mitral valve disease: ViV, ViR, VinMAC, TMVR, PMBV PVLclosure.	Prof. Francesco Saia	1-2-3 year	20/03/25	
Cybersecurity in cardiac electrophysiology	Prof. Antonio Curcio	1-2-3 year	28/03/25	
The future pf cardic stimulation between physiologic and leadless pacing.	Prof. Antonio Rapacciuolo	1-2-3 year	08/04/25	
The campania Salute Network	Prof. Raffaele Izzo	1-2-3 year	15/04/25	
SGLT2 inhibitors and cardiovascular health	Prof. G. Santulli	1-2-3 year	22/04/25	
Translational potential of experimental models for the identification of advanced cardioprotective therapies expendable in clinical settings.	Prof. Tommaso Angelone	1-2-3 year	29/04/25	
Hypertensive Urgencies and Emergencies	Prof. Nicola De Luca	1-2-3 year	06/05/25	
Vitamin D and cardiovascular prevention: the role of insulin resistance	Prof. Carmine Morisco	1-2-3 year	20/05/25	
New insights in atrial fibrillation ablation	Prof.ssa Teresa Strisciuglio	1-2-3 year	22/05/25	
Benefit of Physical acitivity and cardiorehabilitation	Prof. Nicola De Luca	1-2-3 year	27/05/25	
Contemporary lifetime treatment pf aortic valve stenosis	Prof. Tarantini Giuseppe	1-2-3 year	29/05/25	
DISEASES OF THE CARDIOVASCULAR SYSTEM	Prof. E. Barbato	1-2-3 year	03/06/25	
New non-invasive and invasive therapies for the treatment of obstructive hyertrophic cardiomyopathy	Prof. Maria Angela Losi	1-2-3 year	10/06/25	8
Physical activity and cardiovascular prevention	Prof. Carmine Morisco	1-2-3 year	17/06/25	
Coronary physiology and microcirculation	Prof. Alberto Polimeni	1-2-3 year	24/06/25	
Carotid stenosis: how to diagnose and how to treat?	Prof. Giuseppe Giugliano	1-2-3 year	01/07/25	
Transcatheter aortic valve implantation: historical and contemporary	Prof.ssa Anna Franzone	1-2-3 year	08/07/25	
Molecular mechanisms of heart failure	Prof.ssa Michela Ciccarelli	1-2-3 year	09/07/25	
Role of haemodynamic interventional therapy in the treatment of cardiovascular disease	Prof. Esposito Giovanni	1-2-3 year	24/07/25	
Role of the gut microbiota in cardiovascular disease: a new risk factor?	Prof.ssa Cinzia Perrino	1-2-3 year	09/09/25	
Cancer associated thrombosis: pathogenesis, risk factors, prphylaxis and treatment	Prof.ssa Antonella Tufano	1-2-3 year	16/09/25	
Peri-operative managemnet of anticoagulat drugs	Prof.ssa Antonella Tufano	1-2-3 year	16/09/25	
Multivessel disease and acute coronary syndromes	Prof. Raffaele Piccolo	1-2-3 year	23/09/25	
Heart failure: from guidelines to new perspectives in clinical research	Prof. Massimo Piepoli	1-2-3 year	07/10/25	
Cardiovascular prevention: from stratification to individual and population interventions	Prof. Massimo Piepoli	1-2-3 year	14/10/25	
Pathophysiology of aortic stenosis and approach to therapy	Prof. Ciro Indolfi	1-2-3 year	21/10/25	

1 CFU = 24 hours (lectures and advanced training activities aimed at enhancing skills in the development of research projects during dedicated workshops, exercises and group study, progressively organised from the lectures.)

Course Title	Professor	Date	Description
Evolving concepts to balance ischemic and bleeding risk and optimize antiplatelet therapy after PCI	Prof. Giuseppe Gargiulo	04/03/25	Analysis of modern strategies to balance ischemic and bleeding risk, improving antiplatelet therapy management in PCI patients.
Balloon Pulmonary Angioplasty in Chronic Thromboembolic Pulmonary Hypertension	Prof. Francesco Saia	12/03/25	Minimally invasive therapeutic approach for the management of chronic thromboembolic pulmonary hypertension through balloon pulmonary angioplasty.
Transcatheter therapies for mitral valve disease: ViV, ViR, VinMAC, TMVR, PMBV PVLclosure	Prof. Francesco Saia	20/03/25	Exploration of transcatheter therapies for the treatment of mitral valve diseases, including innovative approaches for replacements and repairs.
Cybersecurity in cardiac electrophysiology	Prof. Antonio Curcio	28/03/25	Evaluation of cybersecurity risks in cardiac electrophysiology devices and systems.
The future of cardiac stimulation between physiologic and leadless pacing	Prof. Antonio Rapacciuolo	08/04/25	Evolution of cardiac stimulation with a focus on leadless and physiologic pacemakers.
The Campania Salute Network	Prof. Raffaele Izzo	15/04/25	Presentation of the Campania Salute Network and its role in regional cardiovascular prevention and management.
SGLT2 inhibitors and cardiovascular health	Prof. G. Santulli	22/04/25	Insight into the effects of SGLT2 inhibitors in cardiovascular protection and diabetes management.
Translational potential of experimental models for the identification of advanced cardioprotective therapies	Prof. Tommaso Angelone	29/04/25	Study of the translational potential of experimental models to develop new cardioprotective therapies.
Hypertensive Urgencies and Emergencies	Prof. Nicola De Luca	06/05/25	Clinical management of hypertensive urgencies and emergencies.
Vitamin D and cardiovascular prevention: the role of insulin resistance	Prof. Carmine Morisco	20/05/25	Role of vitamin D in cardiovascular prevention and its modulation of insulin resistance.
New insights in atrial fibrillation ablation	Prof.ssa Teresa Strisciuglio	22/05/25	Innovations in atrial fibrillation ablation techniques and strategies.
Benefit of physical activity and cardiorehabilitation	Prof. Nicola De Luca	27/05/25	Benefits of physical activity and cardiac rehabilitation in cardiovascular prevention and management.
Contemporary lifetime treatment of aortic valve stenosis	Prof. Tarantini Giuseppe	29/05/25	Overview of modern therapeutic options for the treatment of aortic valve stenosis.
Diseases of the cardiovascular system	Prof. E. Barbato	03/06/25	Introduction to major cardiovascular diseases and their diagnostic and therapeutic approaches.
New non-invasive and invasive therapies for obstructive hypertrophic cardiomyopathy	Prof. Maria Angela Losi	10/06/25	Innovative approaches for managing obstructive hypertrophic cardiomyopathy.
Physical activity and cardiovascular prevention	Prof. Carmine Morisco	17/06/25	Role of physical activity in cardiovascular disease prevention.
Coronary physiology and microcirculation	Prof. Alberto Polimeni	24/06/25	Exploration of coronary physiology and the role of microcirculation in cardiovascular diseases.
Carotid stenosis: how to diagnose and how to treat?	Prof. Giuseppe Giugliano	01/07/25	Diagnosis and treatment of carotid stenosis with clinical and interventional approaches.
Transcatheter aortic valve implantation: historical and contemporary	Prof.ssa Anna Franzzone	08/07/25	Historical evolution and current state of transcatheter aortic valve implantation (TAVI) for aortic stenosis treatment.
Molecular mechanisms of heart failure	Prof.ssa Michela Ciccarelli	09/07/25	Study of the molecular mechanisms behind heart failure.
Role of haemodynamic interventional therapy in cardiovascular disease	Prof. Esposito Giovanni	24/07/25	Use of hemodynamic interventional therapy in the management of cardiovascular diseases.
Role of the gut microbiota in cardiovascular disease: a new risk factor?	Prof.ssa Cinzia Perrino	09/09/25	Role of gut microbiota as a potential risk factor for cardiovascular disease.
Cancer-associated thrombosis: pathogenesis, risk factors, prophylaxis, and treatment	Prof.ssa Antonella Tufano	16/09/25	Analysis of cancer-associated thrombosis, including pathogenesis, risk factors, and treatment.
Peri-operative management of anticoagulant drugs	Prof.ssa Antonella Tufano	16/09/25	Management of anticoagulant drugs in the perioperative setting.
Multivessel disease and acute coronary syndromes	Prof. Raffaele Piccolo	23/09/25	Management of acute coronary syndromes in patients with multivessel disease.
Heart failure: from guidelines to new perspectives in clinical research	Prof. Massimo Piepoli	07/10/25	Application of guidelines and innovations in heart failure clinical research.
Cardiovascular prevention: from stratification to individual and population interventions	Prof. Massimo Piepoli	14/10/25	Personalized and population-wide cardiovascular prevention strategies.
Pathophysiology of aortic stenosis and approach to therapy	Prof. Ciro Indolfi	21/10/25	Understanding the pathophysiology of aortic stenosis and available therapeutic options.

Titolo dell'Insegnamento	Professore	Data	Descrizione
Evolving concepts to balance ischemic and bleeding risk and optimize antiplatelet therapy after PCI	Prof. Giuseppe Gargiulo	04/03/25	Analisi delle strategie moderne per bilanciare il rischio ischemico ed emorragico, migliorando la gestione della terapia antipiastinica nei pazienti sottoposti a PCI.
Balloon Pulmonary Angioplasty in Chronic Thromboembolic Pulmonary Hypertension	Prof. Francesco Saia	12/03/25	Approccio terapeutico mini-invasivo per la gestione dell'ipertensione polmonare cronica tromboembolica mediante angioplastica con palloncino.
Transcatheter therapies for mitral valve disease: ViV, ViR, VinMAC, TMVR, PMBV PVLclosure	Prof. Francesco Saia	20/03/25	Esplorazione delle terapie transcatetere per il trattamento delle patologie della valvola mitrale, inclusi gli approcci innovativi per sostituzioni e riparazioni.
Cybersecurity in cardiac electrophysiology	Prof. Antonio Curcio	28/03/25	Valutazione dei rischi di sicurezza informatica nei dispositivi e nei sistemi di elettrofisiologia cardiaca.
The future of cardiac stimulation between physiologic and leadless pacing	Prof. Antonio Rapacciuolo	08/04/25	Evoluzione della stimolazione cardiaca con focus su pacemaker leadless e fisiologici.
The Campania Salute Network	Prof. Raffaele Izzo	15/04/25	Presentazione del network Campania Salute e il suo ruolo nella prevenzione e gestione cardiovascolare regionale.
SGLT2 inhibitors and cardiovascular health	Prof. G. Santulli	22/04/25	Approfondimento sull'effetto degli inibitori SGLT2 nella protezione cardiovascolare e gestione del diabete.
Translational potential of experimental models for the identification of advanced cardioprotective therapies	Prof. Tommaso Angelone	29/04/25	Studio del potenziale traslazionale dei modelli sperimentali per sviluppare nuove terapie cardioprotettive.
Hypertensive Urgencies and Emergencies	Prof. Nicola De Luca	06/05/25	Gestione clinica delle urgenze e emergenze ipertensive.
Vitamin D and cardiovascular prevention: the role of insulin resistance	Prof. Carmine Morisco	20/05/25	Ruolo della vitamina D nella prevenzione cardiovascolare e nella modulazione dell'insulino-resistenza.
New insights in atrial fibrillation ablation	Prof.ssa Teresa Strisciuglio	22/05/25	Innovazioni nelle tecniche e strategie per l'ablazione della fibrillazione atriale.
Benefit of physical activity and cardiorehabilitation	Prof. Nicola De Luca	27/05/25	Benefici dell'attività fisica e della riabilitazione cardiologica nella prevenzione e gestione delle patologie cardiovascolari.
Contemporary lifetime treatment of aortic valve stenosis	Prof. Tarantini Giuseppe	29/05/25	Panoramica sulle opzioni terapeutiche moderne per il trattamento della stenosi aortica.
Diseases of the cardiovascular system	Prof. E. Barbato	03/06/25	Introduzione alle principali patologie cardiovascolari e ai loro approcci diagnostici e terapeutici.
New non-invasive and invasive therapies for obstructive hypertrophic cardiomyopathy	Prof. Maria Angela Losi	10/06/25	Approcci innovativi per la gestione della cardiomiopatia ipertrofica ostruttiva.
Physical activity and cardiovascular prevention	Prof. Carmine Morisco	17/06/25	Ruolo dell'attività fisica nella prevenzione delle malattie cardiovascolari.
Coronary physiology and microcirculation	Prof. Alberto Polimeni	24/06/25	Esplorazione della fisiologia coronarica e del ruolo della microcircolazione nelle patologie cardiovascolari.
Carotid stenosis: how to diagnose and how to treat?	Prof. Giuseppe Giugliano	01/07/25	Diagnosi e trattamento della stenosi carotide con approcci clinici e interventistici.
Transcatheter aortic valve implantation: historical and contemporary	Prof.ssa Anna Franzone	08/07/25	Evoluzione storica e stato attuale della TAVI come terapia per la stenosi aortica.
Molecular mechanisms of heart failure	Prof.ssa Michela Ciccarelli	09/07/25	Studio dei meccanismi molecolari alla base dell'insufficienza cardiaca.
Role of haemodynamic interventional therapy in cardiovascular disease	Prof. Esposito Giovanni	24/07/25	Uso della terapia emodinamica interventistica nella gestione delle patologie cardiovascolari.
Role of the gut microbiota in cardiovascular disease: a new risk factor?	Prof.ssa Cinzia Perrino	09/09/25	Ruolo del microbiota intestinale come potenziale fattore di rischio cardiovascolare.
Cancer-associated thrombosis: pathogenesis, risk factors, prophylaxis, and treatment	Prof.ssa Antonella Tufano	16/09/25	Analisi della trombosi associata al cancro, con focus su patogenesi, fattori di rischio e trattamento.
Peri-operative management of anticoagulant drugs	Prof.ssa Antonella Tufano	16/09/25	Gestione perioperatoria dei farmaci anticoagulanti.
Multivessel disease and acute coronary syndromes	Prof. Raffaele Piccolo	23/09/25	Gestione delle sindromi coronarie acute nei pazienti con malattia multivasale.
Heart failure: from guidelines to new perspectives in clinical research	Prof. Massimo Piepoli	07/10/25	Applicazione delle linee guida e innovazioni nella ricerca sull'insufficienza cardiaca.
Cardiovascular prevention: from stratification to individual and population interventions	Prof. Massimo Piepoli	14/10/25	Strategie di prevenzione cardiovascolare personalizzate e su scala di popolazione.
Pathophysiology of aortic stenosis and approach to therapy	Prof. Ciro Indolfi	21/10/25	Comprendere della fisiopatologia della stenosi aortica e delle opzioni terapeutiche disponibili.
